

Outdoor Performance

From the blistering sun of the Australian outback to the soaking rains of the Brazilian rain forests, nothing handles the changing moods of Mother Nature better than WeatherMax®.

Utilizing breakthrough UV technology, WeatherMax not only goes the distance with the long term color retention of traditional acrylic fabrics, but reaches far beyond for superior water resistance and durability. With engineered yarn memory, WeatherMax always maintains a sophisticated appearance and never exhibits unsightly sagging from age, rain or exposure. Our HydroMax finish means no coatings for a cleaner environment and an excellent breathable fabric, for outstanding mold and mildew resistance. WeatherMax, a perfect balance of science, toughness and elegance combined to battle the elements and provide the finely balanced outdoor fabric you've been wanting...but couldn't get. Until now.

"WeatherMax has proven to be a great product for PorterCorp. In fact, it's now our standard weather proof fabric. As a result of WeatherMax's quality, strength, and ease of sewing, PorterCorp is gaining access into new markets. WeatherMax is lightweight, very rugged and maintains its shape on a wide variety of frames under very challenging conditions and diverse climates. And, the color stability is outperforming the better known fabrics."
